

UMAIR ALI

FULL-STACK WEB DEVELOPER

03061134874 | ua0689110@gmail.com | Mugalabad, Rawalpindi | github.com/umairali110 | linkedin.com/in/umairali110

PROFESSIONAL SUMMARY

Computer Science student and full-stack web developer with hands-on experience building production-style applications using Next.js, NestJS, TypeScript, React, and PostgreSQL. Completed internships at DevSphere and Nayatel, gaining practical exposure to real-world development workflows, backend architecture, and AI integration. Passionate about building clean, scalable, AI-powered web applications and continuously expanding technical skills.

EDUCATION

Bachelor of Science in Computer Science *2023 – In Progress*

Barani Institute of Management Sciences (Affiliated with Arid University) • CGPA: 3.3 / 4.00 • Expected Completion: Jan 2027

Intermediate (ICS) *2021 – 2023*

Sir Syed College • Marks: 568 / 1100

Matriculation (Science) *Completed 2020*

Standard High School • Marks: 822 / 1100

INTERNSHIP EXPERIENCE

Software Engineering Intern — Nayatel *3 Months*

- Worked under the guidance of the team lead to integrate AI-powered features into a full-stack weather application.
- Built and connected backend endpoints in NestJS to serve AI-generated responses grounded in live weather data.
- Gained hands-on experience with prompt engineering, third-party API integration, and code review practices.

Web Development Intern — DevSphere *2 Months*

- Contributed to front-end development tasks as part of a collaborative development team.
- Gained exposure to real-world development workflows, version control practices, and team-based coding standards.

PROJECTS

WeatherNow — AI-Powered Weather Application *Personal Project*

A full-stack weather application that combines live weather data with an AI assistant capable of answering natural-language questions such as "Can I go hiking tomorrow?" or "Should I carry an umbrella today?". The AI generates context-aware responses grounded in real-time temperature, forecast, humidity, and air quality data rather than generic answers.

Tech Stack: Next.js, NestJS, TypeScript, OpenWeather API, Hugging Face Inference API

MovieVault — Full-Stack Movie Discovery Platform *Personal Project*

A Netflix-style movie platform where users can browse trending, popular, and top-rated movies, watch trailers, view cast details, and manage a personal profile with a saved favorites list, powered by real-time data from TMDB. Implemented JWT-based authentication, avatar uploads, and a theme-aware light/dark UI, with the TMDB API key kept private through a secured NestJS backend proxy.

Tech Stack: Next.js, TypeScript, Tailwind CSS, NestJS, TypeORM, PostgreSQL, JWT, Multer

Full-Stack E-Commerce Platform *Personal Project*

A production-ready e-commerce application featuring role-based authentication with OTP verification, product and inventory management, a cart and order system, and an admin dashboard. Integrated Stripe for payments and Cloudinary for image storage and delivery.

Tech Stack: Next.js, React, Redux, Tailwind CSS, NestJS, TypeORM, PostgreSQL, Stripe, Cloudinary

Role-Based Admin Dashboard *Personal Project*

A full-stack admin dashboard with secure JWT authentication, OTP verification, and role-based access control distinguishing Admin and User permissions for employee management, including full CRUD operations and permission-scoped data visibility.

Tech Stack: Next.js, React, Tailwind CSS, NestJS, TypeORM, PostgreSQL, JWT

TOOLS & TECHNOLOGIES

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS, Redux, HTML5, CSS3

Backend: NestJS, TypeORM, REST APIs

Database: PostgreSQL

Authentication: JWT, OTP Verification

Third-Party APIs: OpenWeather API, Hugging Face Inference API, TMDB API, Stripe, Cloudinary

Tools: Git, GitHub, VS Code, Postman
